

## CONTENTS

**The effect of chemical modifications with spherosilicates of nanocomposite waterborne polyurethane hydrophilic coatings on anti-icing properties**

K. Ziętkowska, R. Kozera, B. Przybyszewski, A. Łabęda, A. Boczkowska, B. Sztorch, R.E. Przekop, M. Pilz, C.W. Karl..... 1

**Application of ai and machine learning to the theory Of composite materials**

V.V. Mityushev, K.B. Nurtazina, N.Zh. Nauryzbayev..... 11

**Anti-icing and hydrophobic performance of chemically mod-ified waterborne polyurethane hybrid coatings**

R. Kozera, B. Przybyszewski, K. Ziętkowska, A. Łabęda, A. Boczkowska, B. Sztorch, R.E. Przekop, C.W. Karl, M. Pilz.....21

**Zirconium dioxide/tungsten carbide composite – influence of sintering technique on phase composition and microstructure**

Z. Pędzich, A. Wilmański, A. Wojteczko, S. Komarek, D. Kozień, P. Klimczyk.....30

**Numerical analysis of the strength and stiffness of triggo light electric vehicle body**

Ł. Stachowicz, A. Boczkowska, R. Budweil.....38

**Manufacturing and technological properties of cu-al2o3 composite powders manufactured by mechanical alloying process**

A. Kurzawa, J.W. Kaczmar .....49
