

CONTENTS

**Role of potential components used in organic composite materials for braking application:
impact on friction and wear mechanisms**

M. Kchaou 81

Application of fly ash/chitosan composites for heavy metal adsorption

E. Osmani, I. Dimitrievska, P. Paunovik, K. Atkovska, F. Rexhepi, A. Grozdanov 87

**Investigation of GNP effect on mechanical and morphological characteristics of liquid phase
sintered SS316l nanocomposites processed via mechanical alloying and pressureless sintering**

K. Veeramallu, A. Gopala Krishna 95

Analysis of influence of specimen dimensions on reliability of tensile strength results

Ł. Gorycki, P. Zagulski 104

AA2024/fly ash lightweight composites fabricated by powder metallurgy

P. Nikiel 108

**Properties and strengthening mechanisms of nickel matrix composites reinforced
with high-speed steel particles**

M. Konieczny 116

Solving technological problems of flight services at airport involving composite materials

M. Romele, A. Zabirov, R. Chatys, V. Shestakov 123

Finite element analysis of stress intensity factors of cracks initiated in multi-materials

S. Attou, F. Bouafia, B. Serier 130

**Investigation of mechanical and degradation characteristics of filament-wound composite pipes
incorporating basalt/E-glass hybrid reinforcement**

D. Sarukasan, K. Thirumavalavan 141

**The influence of variable temperature conditions on selected properties of resin mortars modified
with recycled materials**

B. Dębska, M. Altoé Caetano, G.J. Brigolini Silva 155
